

JESIP

Working Together – Saving Lives

Joint Decision Model

The **Joint Decision Model** (JDM) will help commanders bring together available information, reconcile objectives and then make effective decisions together.

It is organised around three primary considerations:

Situation

What is happening?
What are the impacts?
What are the risks?
What might happen and what is being done about it?

Direction

What end state is desired?
What are the aims and objectives of the emergency response?
What overarching values and priorities will inform and guide this?

Action

What needs to be decided and needs to be done to resolve the situation and achieve the desired end state?
