IDENTIFICATION

Of a multi-agency Lesson or Notable Practice.

INPUT

onto JOL Online by a user or SPoC on behalf of the Emergency Services and responder agencies.

SUBMISSION

The information is not shared at this stage... it goes straight to the JOL Coordinator for impact assessment.

ANALYSE

PROFESIONALIN

The JOL Working Group is made up of organisational points of contact (OPoC) for Police, Fire, Ambulance and LRFs.

JOL WG

The impact assessment and JOL Coordinator's recommendations are then presented to the JOL Working Group (JOL WG).

IMPACT ASSESSMENT

The outcome of the impact assessment ranges from tolerable to high.

STAKEHOLDERMENT

Additional SMAs from other agencies maybe invited to contribute to the discussions

CONFIRMATION

Following discussions, the JOLWG will then confirm the rating and decide on the course of action for the lesson(s). If the lesson is 'tolerable', 'low' the lesson may be published onto JOL Online (recorded for trend analysis) and added to the JOL Online Monthly or as a case study through the CCS quarterly digest.

If the lesson is medium, high, or very high, the JOL WG may request further stakeholder engagement. A JOL Action Note may be required.

The JOL
Action Note
is submitted to
the interoperability
Board for a
approval

PUBLISHED LESSONS

Information through JOL Action Notes and via JOL Online should be shared across all responder agencies and forums via their JOL SPoCs.

Lessons Identified, shared and learned will have a positive impact on influencing government decisions through the National Risk Assessments, doctrine, policy and procedures.

Once approved the note is sent to the JESIP Strategic Lead for each organisation for them to action. The Strategic lead has the responsibility to ensure this action is completed and to feedback progress to the JOL Coordinator who updates the Interoperability Board to confirm compliance.

MILROPERABILITY
